INDIANA

BROOKVILLE LAKE & WHITEWATER MEMORIAL STATE PARK

Brookville Lake provides flood control in the Whitewater Valley and helps reduce flood flows in the Ohio River. The lake also was developed for fish and wildlife, recreation, and municipal and industrial water supply. The lake is in Franklin and Union counties in southeastern Indiana on the east fork of the Whitewater River.

Whitewater Memorial State Park was established in 1949 to honor those who served in World War II. Fayette, Franklin, Union and Wayne counties acquired the initial acreage, which includes wooded rolling hills; steep ridges and ravines; level, open fields; and a manmade lake. The park's Hornbeam Nature Preserve includes an unusually high number of hornbeam and hop hornbeam trees. In spring, the forest is covered with wildflowers.
