Application for Construction of an Acute Care Facility

Effective July 1, 2005, applications for new construction or remodeling of non-federally operated hospitals with an estimated project cost of \$10,000,000 or more, must be accompanied by documentation substantiating that two public hearings were held concerning such proposals. Therefore each application for hospital construction or remodeling must include the estimated cost of the project, excluding equipment and consultant fees. For those projects with an estimated project cost of \$10,000,000 or more, the application must also include copies of the two published public hearing notices; the dates the public hearing notices were published, and the name and location (city/town) of the publication used to publish the notices. Likewise, applications for new construction or remodeling of ambulatory outpatient surgery centers with an estimated project cost of \$3,000,000 or more, must be accompanied by documentation substantiating that two public hearings were held concerning such proposals. Therefore each application for ambulatory outpatient surgery center construction or remodeling must include the estimated cost of the project, excluding equipment and consultant fees. For those projects with an estimated project cost of \$3,000,000 or more, the application must also include copies of the two published public hearing notices; the dates the public hearing notices were published, and the name and location (city/town) of the publication used to publish the notices. The application for Acute Care Facilities (State Form 50097) has been revised to reflect the above noted requirements. Obtain a permit application for construction of an acute care facility.
