- Hep B
- Varicella
- Influenza

The Immunization Division can identify and approve other locations and vaccination needs on a case by case basis.

## Adult Vaccine Program Eligibility Requirements:

To be eligible to receive publicly funded vaccines, adults must be 19 years or older and meet one of the following criteria:

### Uninsured

Must have no private health insurance coverage. Cannot be Medicaid-eligible, regardless of age.

- If Medicaid-eligible or health program covered, use private and stock bill to appropriate source.

### Underinsured

Must have private health insurance that does not provide coverage for a specific vaccine or all ACIP recommended vaccines. All individual vaccines should be screened separately.

- High deductible plans do not qualify as underinsured. These individuals are considered fully insured.
- International travelers are excluded from the underinsured category. Even if they have private insurance that will not cover the needed vaccines, he/she is not eligible for publicly funded doses.
