RFP 23-72675 - ATTACHMENT A1 INDIANA VETERAN OWNED SMALL BUSINESS RFP SUBCONTRACTOR COMMITMENT FORM¹

If participation is met through use of respondents who supply products and/or services directly to the Respondent, the Respondent must provide a description of products and/or services provided that are directly related to this proposal and the cost of direct supplies for this proposal. Respondents must complete the Subcontractor Commitment Form in its entirety. The amount entered in “**TOTAL BID AMOUNT**” should match the sum of the amounts entered in the “4. However, the subcontractor commitment shall apply to the life of the contract including any time after the initial term.

If the Respondent to the solicitation is an IVOSB certified entity, the letter confirming same should be submitted with their response. There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for health care, which is based on the principles of prevention, promotion, and protection. The new paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people. There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of care for the ageing population, one that is based on a 'continuum of care' rather than a 'dual system' of care. The 'new paradigm' is based on the principle that care should be provided in the community wherever possible, and that care should be tailored to the individual's needs.
