Less Lethal	LaHay, ILEA	1	Tech Based
Assaults on Police	(Need Description)	1	Tech Based
*First Aid/CPR,AED	Certified Instructors	8	In Field/Practical

PROGRAM TOTAL: 80 HOURS

***First Aid/CPR,AED**

There are several organizations which certify CPR instructors in protocols of training. Each vary in their approach and in the numbers of hours to become certified. The training needs to include CPR techniques for: infant, child and adult. The training needed to become certified in the use of an AED along with the CPR block must total 4 hours.

The EMS awareness training shall include, but is not limited to: burns, heat exhaustion/stroke, shock assessment, use of Narcan, amputations, seizures, uncontrolled bleeding, head injury, pregnancy delivery/complications, pelvis injuries, open chest wounds, eye injuries, signs of stroke, diabetic emergencies and fractures. Many agencies are also including Tactical Medical training.

The EMS awareness portion should be long enough to fulfill the remaining 4 hours or required training.

You will be required to scan and submit your CPR/AED and First Aid certifications as part of your course file.
