Narratives

Disaster Damage:

The 2008 disasters in Indiana have been among the worst in our state's history. 82 of Indiana's 92 counties were declared as Presidential disaster areas between the three disaster periods (DR-1740, DR-1766 and DR-1795). DR-1766, the result of severe flooding in late May and early June, was clearly the most substantial with 44 counties declared as Presidential disaster areas. FEMA estimates that total IA and PA for this disaster will exceed \$350 million. FEMA and the SBA received 17,844 applications for IA during DR-1766, resulting in over \$127 million in assistance. The PA process is now in full swing with FEMA having 471 applicants from local and state government and an estimated 2,092 project worksheets. Currently 26 million dollars have been obligated to local governments, and PA total estimates exceed \$150 million. While the estimated FEMA assistance is substantial, it will not cover the estimated recovery needs in the areas of economic and workforce development, infrastructure, and housing. The following summarizes the key unmet needs in each of these areas: Economic and Workforce Development The largest economic impact to Indiana will be in the area of agriculture where early estimates indicate that crop losses will exceed \$300 million and land rehabilitation losses for activities like debris and sediment removal, levee repair and soil erosion repair will exceed \$200 million. Impact to other Indiana businesses is likely to exceed \$400 million with most of the damage occurring in the five most effected counties of Bartholomew, Johnson, Vigo, Morgan and Owen. The most substantial areas of damage occurred in Columbus, Indiana, where the Columbus Regional Hospital was completely immobilized and had over \$211 million in damages of which less than \$75 million will be covered by FEMA. Additionally, the city's largest employer reported damages in excess of \$200 million none of which qualified for assistance. Infrastructure Damage to Indiana's public infrastructure will likely exceed \$325 million and it is estimated that FEMA-PA will cover about half, or \$158 million of this expense. The remainder does not qualify, is covered by another Federal program, or represents the state/local match. The chart below depicts the financial assistance the State of Indiana has received. However, the costs that go beyond what is covered below have been identified as key areas of remaining need. FEMA-IA Applicants FEMA-IA Assistance (\$000) SBA Loans (\$000) FEMA-PA Assistance (\$000) Total Financial Assistance (\$000) June Flooding & Tornadoes DR-1766 17,840 54,241 71,711 158,502 284,454 About half of Indiana's PA expense comes from the extensive damages to Columbus Regional Hospital, a major hospital servicing a large portion of Southeastern Indiana. The hospital suffered over \$211 million in damage of which about half will qualify for FEMA-PA. One of the state's top priorities has been to help CRH recover from the catastrophic losses experienced in June of 2008, and a portion of PA-match funding would be for this effort. The remaining PA expenses result from damage to a mixture of public infrastructure such as damaged roads, bridges, dams and levees. Of note, Indiana's local FEMA-PA match will likely exceed \$40 million. Indiana will likely not achieve an automatic reduction in the FEMA match rate from 25% to 10% as our statewide per capita loss will be

Disaster Damage:

elow the \$122 threshold. However, our hardest hit counties have more than exceeded this threshold and thus this match will be a burden to them. The disaster CDBG funds will be key in helping reduce this local burden. Housing Indiana has over 17,000 families who suffered some type of damage to their dwelling. Housing is a key challenge for the state. FEMA-IA has provided substantial assistance; however, additional help will be required.

Recovery Needs:

The most urgent need is to insure that those communities wanting to participate in a buy-out program have the resources to do so. Over 550 homes totaling \$71MM could be purchased through the home buy-out program with local match exceeding \$17MM. Many communities have opted to participate in the home buy-out program offered by FEMA as most of these homes have been completely destroyed and are in floodplains. While this will clearly benefit the community long-term, two issues exist. First, the match requirement is burdensome and in many cases homeowners have been left in limbo while local communities wrestle with this issue. Some communities are currently deciding not to include significantly damaged homes in the buy-out because they are concerned about funding their 25% match. Second, the state anticipates

receiving only \$30 million from FEMA in HMGP funds. This estimate is based on FEMA's formula which determines the HMGP funds based on 15% of both IA and PA. This results in slightly more than a \$25 million shortfall. Indiana now has 14 local Long Term Recovery Committees (LTRCs) assessing the other unmet needs in counties declared during DR-1766. Early estimates indicate that those needs could exceed \$20 million. The vast majority of this need will be to ensure that communities have adequate affordable housing options. METHOD OF DISTRIBUTION All local units of government (cities, towns, counties) will be eligible for the Disaster Recovery program, including HUD Entitlements. Flood Plain Acquisition and Green Space Development IHEDA, in coordination with the Indiana Department of Homeland Security (IDHS), proposes to provide grants that allow cities, towns, and counties to acquire and demolish substantially damaged residential properties contained within a floodplain or floodway and to redevelop the area into permanent green space for community use. The voluntary program must be initiated by a local community and be agreed to by individual homeowners. In order to be considered for mitigation funds, communities must have a FEMA-approved multi-hazards mitigation plan. The Indiana Department of Homeland Security has provided grants to the 42 counties impacted by the floods to complete these plans. To expedite the overall process, FEMA has given approval for communities to apply for mitigation funds while they assemble their multi-hazards plans. Interested communities must submit a joint grant application to IDHS. Once a property is approved for purchase, the Federal Emergency Management Agency (FEMA) will cover 75 percent of the acquisition cost with the remaining 25 percent to be paid by the local unit of government, which can use CDBG funding to offset its match requirement. Priority will be given to communities with the greatest needs considering the concentration of affected individuals and financial need of each local unit of government. Specific criteria include: "the community's match obligation as a percent of its annual budget;" "the median assessed value of the residential properties in the buy-out area; and" "the concentration of individual assistance applications in an impacted community. The Flood Plain Acquisition and Green Space Development Program has no maximum grant amount. Allocation: \$22,826,594 Emergency Rental Assistance From the beginning of the disaster, under the leadership of Governor Daniels, IHEDA took an active role in ensuring that those victims of the flood

Recovery Needs:

rary housing for all displaced victims. For displaced flood victims that were ineligible to receive FEMA assistance, IHEDA committed to paying any necessary security deposit and three months rent. For all of those who were deemed eligible to receive FEMA assistance, IHEDA committed to paying any necessary security deposit. IHEDA paid \$823,405.85 in temporary rental assistance to property owners to ensure the immediate housing of those displaced by the floods. The State would request that a portion of the CDBG Disaster Recovery Funds be used to reimburse IHEDA for these up-front costs. Allocation: \$823,406 Public Infrastructure The CDBG Disaster Recovery Fund (DRF) will be available through the Indiana Office of Community and Rural Affairs. This fund will help offset the twenty-five percent (25%) FEMA match for various eligible public facilities activities pursuant to 24 CFR 570.201(c) and 24 CFR 507.201(f)(2). The Office of Community and Rural Affairs will give priority for activities that benefit at least 51% low-to-moderate income persons. Eligible DRF activities will include most activities eligible under FEMA Public Assistance - Category A, Category B (Permanent Restoration of Facilities), Category C, Category D (limited), Category E (buildings), Category F, Category G (limited). Eligible activities will be determined by OCRA on a project by project basis. Examples include: 1. Construction/rehabilitation of public wastewater systems; 2. Construction/rehabilitation of public drinking water systems; 3. Construction/rehabilitation of storm drainage systems; 4. Rehabilitation of public roadways, bridges and dams; 5. Construction/rehabilitation of public facility buildings. Projects/applications will be evaluated using the following criteria: 1. The importance of the project to post disaster recovery of the applicant; 2. The percentage of low-to-moderate income persons served; 3. The percentage of grant amount in relation to applicant's annual budget; 4. The relative economic distress of the applicant. Grant applications will be accepted and awards made until funding is no longer available. The intent of the program is to provide the non-federal share of necessary public improvements and/or rehabilitation related to the 2008 presidentially declared disaster. A minimum of fifty percent (50%) of grant funds will be awarded to projects that benefit at least 51% low-to-moderate income persons. Actual grant amounts are negotiated on a case by case basis and the amount of assistance will be dependent upon the factors described above. There is no maximum grant award for the Public Assistance Match Program. Allocation: \$40,000,000 Administration The State will set aside \$3,350,000 of its CDBG Disaster Recovery Funds for payment of costs associated with administering the Program (Docket No. FR-5250-N-01). This constitutes five percent (5%) of the State's CDBG Disaster Recovery allocation. These funds will be used by the Office of Community and Rural Affairs for expenses associated with administering its State CDBG Program, including direct personal services and fringe benefits of applicable Office of Community and Rural Affairs staff, as well as direct and indirect expenses incurred in the proper administration of the state's program and monitoring activities respective to CDBG grants awarded to units of local government (i.e. telephone, travel, services contractual, etc.).Allocation: \$3,350,000

Activity Description:

The city of Crawfordsville sustained damage from the June 2008 flooding event (FEMA 1766). A broken storm sewer pipe is responsible for the closure of Whitlock Avenue. A sink hole and eroding walls around the culvert have made the roadway unsafe. The culvert will be replaced with a new 156 foot culvert; headwall, wingwalls and retaining walls will be constructed. The section of the road affected will be replaced as well as a section of sidewalk. All storm and sanitary sewers will need to be replaced after construction.

Location Description:

Whitlock Avenue in Crawfordsville Indiana

Activity Progress Narrative:

Quarterly report has not yet been submitted for this activity. Project is considered noncompliant by OCRA. All financial draws have been halted until a report is submitted.

Activity Description:

The City of Bloomington was adversely impacted by the June 2008 floods (FEMA 1766) and the Bloomington Salvation Army was flooded. Too much rain overwhelmed the existing drainage system and allowed water to pour into the basement. The project will include the removal and replacement of interior basement wall, mold remediation, roof and stairway replacement; all of which were damaged by the heavy rains and storms.

Location Description:

111 N. Rogers Street
Bloomington, Indiana 47404

Activity Progress Narrative:

Activity is complete; project monitored for compliance and administratively closed. The subrecipient will continue to be monitored on a yearly basis for the next five years.

Activity Description:

The heavy sheet rain and driving winds during May and June 2008 have caused severe slope erosion along Offield Creek adjacent to Montgomery County Road 300S and threatens to destabilize the road. Any further degradation of the slope will damage portions of CR 300S. The project will correct the slope failure using a three pronged approach. Drainage control, erosion control at the toe of the slope (near creek level) and the construction of a retaining wall along CR 300S will prevent further slope erosion and avert road damage that is likely to occur if erosion continues.

Location Description:

Montgomery County Road 300S just east off of Indiana State Road 47 in Montgomery County, Indiana

Activity Progress Narrative:

This project was complete until it was noticed in December 2011 movement of installed surface material. Due to saturation problems soil testing was conducted. The grant period was pushed back to October 31, 2012 to accomodate work on new drainage to remedy uncustomary soil conditions. Work is still in progress.

Activity Description:

As a result of the June 2008 flood disaster (FEMA 1766), Putnam County received extensive damage to 26 bridges and abutments as a result of high velocity flooding in the streams and creeks of the county. This event was widespread and covered the entire county with heavy rains and flash flooding. Putnam County is applying for funding to help rehabilitate 26 damaged bridges/abutments that is estimated to be just over 21,000 linear feet of work that is critical to the county-wide transportation network. The scope of work for each bridge will vary depending on the type of damage sustained.

Location Description:

damage is to bridges/roads throughout Putnam County Indiana

Activity Progress Narrative:

Bridge and street reconstruction is complete. Project was monitored for compliance and closed.

Activity Description:

The City will use grant funds to make improvements to the storm drainage system. In June, 2008 the residential flooding which occurred was severe and many businesses were damaged as a result of the disaster. Greensburg will install two detention ponds to contain the excess water and will install a 60" culvert by jack and bore method with a casing pipe at the railroad crossing over Gas Creek. These improvements are necessary to reduce future flooding and encourage economic development in this disaster affected community.

Location Description:

Detention pond #1 between Montgomery Road and I-74
Detention pond #2 located NE of the intersection of Montgomery Road and North Davidson Street
culvert railroad crossing over Gas Creek
all in Greensburg Indiana

Activity Progress Narrative:

This project is complete and close-out paperwork will be submitted October 2012.

Activity Description:

The Town of Prince's Lakes was adversely affected by the severe rain event that occurred May/June 2008 (FEMA 1766). On June 7, 2008 the dam overtopped with a wall of water that caused a significant amount of erosion and soil loss of the embankment. The project will consist of constructing a 125' wide x 11' high concrete labyrinth type spillway. This will include a concrete spillway chute, chute blocks and an impact basin followed by an earthen channel lined with riprap.

Location Description:

Rozell Drive in the town of Prince's Lakes in Johnson County Indiana
Section 33, T. 11 N., R. 4 E. Nineveh Quadrangle Map
Census Tract number 6114

Activity Progress Narrative:

The project is complete. This is a major dam structure and requires the level of the lake to increase to a sufficient height to test the dam for seepage and leaks. The grant end should provide sufficient time for this purpose.

Activity Description:

The Town will use grant funds to rehabilitate the dam which is classified as conditionally poor. Improvements include: the embankment will be reconstructed to an appropriate slope; the primary spillway will be removed and replaced with a 60" concrete outlet pipe; and riprap and a filter fabric will be placed at the outlet into East Lake. Damage to the dam was related to FEMA 1766 and the improvements are vital to the long term recovery of the Town.

Location Description:

On S. Fleming Drive in the Town of Prince's Lakes in southeastern Johnson County, Indiana

Activity Progress Narrative:

Construction is complete. The town is waiting for sufficient rainfall to raise the level of the lake to test for seepage and leaks. The grant end date of November 30th should provide enough time.

Activity Description:

During the June flooding of 2008 the Hants Lake Dam was overtopped. The Town will use grant funds to rehabilitate the dam and bring it up to the Indiana Department of Natural Resources code. The project includes; embankment reconstruction, removal and replacement of the existing spillway, reinforced concrete headwall and riprap, construction of an outlet channel and a toe drain and erosion control measures.

Location Description:

West of S. Nineveh Drive, North of E. Dunham Drive in the town of Prince's Lakes in southeastern Johnson County, Indiana

Activity Progress Narrative:

The project will be bid in December 2012. The project engineer indicates the project should be completed by our grant expiration date of September 30, 2013.

Activity Description:

The Wildwood Lake Dam located in Morgan County is classified as a high hazard dam due to the potential for loss of life and serious damage to property downstream of the dam in the event of a catastrophic failure. The dam sustained damage as a result of the flooding in 2008 (FEMA 1766). Improvements to the dam include a new principle spillway, trash rack, drawdown valve, raising the dam, and embankment and emergency spillway improvements.

Location Description:

Lower Wildwood Lake Dam is located on Sinking Creek in Morgan County, Indiana.

Activity Progress Narrative:

Project is 100% complete. In the process of closing out the grant.

Activity Description:

The City of Greencastle was adversely affected by the disaster of 2008 and Albin Lake Dam was damaged as a result of the severe weather. Damage to the dam includes missing mortar and rock was dislodged resulting in the dam continuously leaking. The dam is classified as a high hazard dam. A major water line runs along the crest of the dam and failure of the dam would cause significant problems with water distribution and fire protection and is important to the continued recovery of this disaster affected community. The improvements to the dam include: replacement of the existing spillway, flattening of the dam slopes to improve stability, widening of the roadway that crosses the dam to meet minimum standards and a grass safety ledge for pedestrian access.

Location Description:

Albin Lake Dam in the City of Greencastle, IN in Putnam County.

Activity Progress Narrative:

The project is currently 75% complete. Substantial completion is expected for approximately November 1, 2012. The project engineer is pleased with the main contractor's performance.

Activity Description:

Jennings County will use grant funds to make dam improvements to the Country Squire Lakes Dam. The improvements will address seepage through the underlying geologic features on which the embankment structure is founded and the hydraulic capacity of the spillway. The project includes constructing a grout curtain along the centerline of the dam; installation of overtopping protection which will consist of a grout curtain constructed along the centerline; installation of overtopping projection which will consist of a large rock fill; extension of a primary spillway conduit; repairs to existing sluice gate, construction of an energy dissipation device, preparation of an operation and maintenance manual and an emergency action plan.

Location Description:

Country Squire Lake on Six Mile Creek in North Vernon, IN in Jennings County.

Activity Progress Narrative:

A contract is signed and the project is under construction. No problems to report.

Activity Description:

The Peoga Lakes Dam does not meet Indiana Department of Natural Resources safety requirements. The water level of the lake has been lowered by 10&rsquo to relieve the pressure on the dam and reduce the risk of an uncontrolled breach which would result in loss of life and damage to property and infrastructure downstream. A semi-circular weir, a concrete chute with baffle blocks, rip-rap and a drawdown valve will be constructed to alleviate flooding and increase the efficacy of the dam. These improvements are necessary to protect the disaster affected community.

Location Description:

Johnson County, Peoga Lakes

Activity Progress Narrative:

The project was rebid February 2012 and the bids within the project is moving forward. Construction is approximately 32% complete. Problems have arisen with the contractor in which walk-offs have occurred many times. The State is aware of the issue. A performance bond may be used.

Activity Description:

Hulman Dam provides flood control measures for thousands of resident and businesses downstream. During the 2008 flood disaster event the dam sustained damage mainly to the primary spillway area where the velocity of the water rushing out caused erosion along this outlet area. Restoration and reshaping of the spillway outlet and adding an additional five feet to the top of the dam will be accomplished through this project. The additional height will provide greater protection from flooding during a PMP event.

Location Description:

City of Terre Haute Hulman Lake Dam, Vigo County, Indiana

Activity Progress Narrative:

Final engineering services is underway. It is estimated bids will be received by the end of 2012.

Activity Description:

The City of Clinton will use grant funds to make storm water improvements on 10 acres around Feather Creek. The project will include widening sections of the creek, clearing and grubbing from bank to bank including debris removal, excavation of portions of the creek's slopes, installation of drainage structures, gabion basket additions, and the installation of granular bedding and riprap.

Location Description:

Feather Creek, Clinton, Indiana

Activity Progress Narrative:

This joint project has received an extended completion date and additional funding due to construction estimates raising. The sewer line relocation activity must be completed before the main construction on Feather Creek. Contract for this work has begun October 2012.
